

Dig into "The Diamond Mine" from Diamond Technologies Inc.

THE DIAMOND MINE

DIAMOND SIGNS ON AS DATALOGIC ELITE QP

Diamond Technologies is proud to announce its 15th year of partnership with Datalogic Automation. Diamond has signed on as a Datalogic Elite QP, only one of a handful in the US!

POWERSCAN 9500

Aim, Trigger and Decode:
With the new [PowerScan 9500 imager](#) it's that simple

The new [PowerScan 9500 family](#) of imagers bursts onto the scene with cutting edge technology and rugged reliability making the most demanding applications in warehouses, logistics centers and manufacturing plants faster and easier than ever before.

The **PowerScan 9500 imager** is a high speed performer. Thanks to its outstanding snappiness and depth-of-field, 1D and 2D codes are read in an instant. Its intuitive frame aimer, automatically activated with Motionix™ technology, allows the operator to aim and decode accurately and quickly, while Datalogic's 3GL™ technology provides visual good read confirmation immediately. This combination guarantees the highest first-pass reading rates around.

And if the imager drops, what happens? Absolutely nothing because the [PowerScan 9500 imager](#) is built to be tough. It resists drops from 2 m/6.6 ft to concrete and offers IP65 water and particulate sealing rating protecting all the optical parts as well.

The PowerScan 9500 imager is the perfect choice for industrial applications: fast, easy to use and tough. Try it out and see for yourself!

Something Inspiring

DT7000 Industrial Network Gateway

The simple way to add
industrial networking to
your product:

- Connects Serial to Industrial Networks
- Digital & Analog I/O Capable
- Ethernet Options
- Flexible & Cost-Effective

Way Cool!

connectBlue Bluetooth
v4.0 Low Energy Modules

- Accelerometer
- Temperature Sensor
- User Programmable
- Analog Inputs
- Up to 10 yr battery life

Who We Are

Diamond Technologies is a provider of leading products, ideas and solutions for:

[Industrial Networking](#)
[Data Collection Systems](#)
[Automation](#)
[& Remote Management](#)

We augment this with deep industry knowledge, specialized engineering services and exemplary customer service. We look forward to helping you with your immediate or future needs.
