AUTOMATION SOFTWARE

**OPC**  
**SYSTEMS.NET**

**OPC Systems.NET is a complete suite of all .NET products for SCADA, HMI, and plant floor to business solutions.**

Plug into the power of the first smart client SCADA solution! OPC Systems.NET

Share data with OPC Servers, OPC Clients, .NET applications, SQL Server, Oracle, Access, mySQL, and Excel using your LAN, WAN, and the Internet.

Create HMI applications using Visual Studio or Expression Blend with no programming required for WinForm, Web, and WPF solutions.

### **Download and Training**

Visit [www.opcsystems.com](http://www.opcsystems.com) to download OPC Systems.NET for a free 30 day evaluation and to view on-line training videos.

## OPC Systems.NET is a complete suite of all .NET products

Create visually stunning operator interface applications with no programming required using Visual Studio 2010, Visual Studio 2008, and Expression Blend.

Outstanding 2D and 3D real-time and historical trending.  
  
Integrated into any WinForm or WPF application using Visual Studio 2010, 2008, 2005, or 2003.

Real-time and historical alarming with alarm logging to SQL Server, Oracle, Access, and MySQL, and alarm notification via e-mail.

Create operator interface ASP.NET web applications with no programming required.  
  
View and control data from smart phones including iPhone, Blackberry, and Droid.

Real-time and historical trending for ASP.NET web applications.  
  
100% managed .NET component implementing AJAX for efficient communications for your company network and Internet.

Real-time and historical alarming for ASP.NET web applications with alarm logging to SQL Server, SQL Server Desktop, Oracle, Access, MySQL, and alarm notification via e-mail.

100% managed .NET components supporting Smart Client deployment and communications for your company network and Internet.

Real-time monitoring with radial and liner gauges.  
  
Implement up to 4 axis per gauge, 4 Needles per axis and 5 ranges per axis for a total of 36 values per gauge.

Develop and deploy unlimited Smart Device applications for Windows Mobile 5.0 and 6.0

Data logging to SQL Server, Oracle, Access, MySQL, and CSV files.  
  
The most reliable data logging solution for OPC Servers and .NET applications by implement data buffering on network loss or data base engine failure.

Data transfer from SQL Server, SQL Server Desktop (MSDE), Access, Oracle, and MySQL to OPC Systems.NET Tags and OPC Servers.

Automatically generate reports from any database source including data from OPC Database.NET and OPC Alarm.NET.

OPC Client.NET provides communications to third party OPC Clients to the OPC Systems.NET real-time database and directly to third party OPC Servers.

Transfer data from local and remote OPC Servers and OPC Systems.NET Tags over your local network or Internet.

Read and write data from Microsoft Excel using your local service, Intranet, or Internet.
